Program Administration

Re: Project No. HWM1163
Reconstruction of 7th Ave Penn Station Pedestrian Safety Project.
Borough of Manhattan

Dear Mr. Parker:

Please be advised that the Department of Design and Construction has the following project in preliminary design phase and it is included in our Fiscal Year 2009 Commitment Plan:

The scope of work for this project is the full street reconstruction of 7th Avenue between West 31st and West 34th Street

I have attached a sketch showing the limits of the project.

When DDC undertakes a sewer or water main project, it will be necessary to temporarily shut off water services in order to complete the work. If your community has occasions, observances, religious or other holidays when water shut offs would be particularly intrusive, or may require special planning, please include these in your correspondence. We will make every effort to include your concerns in the planning process.

Please share this information with your Board Members and the community residents and advise us within the next thirty (30) days of any concerns or issues that you believe we should consider during the design of the project(s). Please be advised that we may be unable to address any concerns you may raise after this time.

If you would like any further information or would like a walk-through on this project(s) with us, please contact Marie Jean-Louis, P.E. Borough Director at (718) 391-1748 or Garry Desyr, the Project Administrator at (718) 391-2051.

Sincerely,

N. Venugopalan, P.E.
Assistant Commissioner
Program Administration
